Krish Prakash Bhandari

krrishbhandari44@gmail.com / 9324659348 / github.com / linkedin

Highlights

- Ranked among the **Top 100 teams globally** in the **Google Solution Challenge 2026**, selected from over **85,000+ registrations** worldwide.
- CGPA: 9.85/10
- MHT-CET (PCM): 99.01 Percentile
- Achieved 1st Rank in Physics at the college level in the Maharashtra HSC (Class XII) Board.
- **Cisco Networking Basics** – Cisco Networking Academy *Visit*

Skills

Languages: C++, Java , Python , JavaScript
Frontend : HTML5, CSS3, React.js, Vite, Bootstrap, Tailwind
Backend : Node.js, Express.js , EJS
Databases: MongoDB, MySQL, Firebase Firestore
Cloud : AWS, Google Cloud, Render
Tools & Platforms: Git, GitHub, Figma, Canva

Education

Vivekanand Education Society Institute of Technology Sep 2024 - May 2028
Bachelor of Engineering in Computer Science and Engineering — CGPA: 9.85/10

Relevant Coursework:
Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Discrete Mathematics, Object-Oriented Programming.

Vani Vidyalaya Junior College 2022 – 2024
HSC – (PCMB) : 84.67%

Smt. Radhikabai Meghe Vidyalaya 2021 – 2022
SSC: 95.80%

Project Work

SportShield — Github — Visit

- Developed key backend and real-time monitoring features to help broadcasters identify and investigate unauthorized distribution of sports content across multiple online platforms.
- Implemented secure user authentication and role-based access workflows using **Firebase Authentication**.
- Built real-time violation monitoring using **Firebase Firestore** listeners, allowing investigation teams to receive piracy-event updates instantly without manual refreshes.
- Integrated **Google Cloud Translation API** to generate multilingual search keywords across 10+ languages.

InterviewIQ.AI — Github — Visit

- Architected an AI-driven mock interview platform that simulates real interview scenarios with adaptive question difficulty (Easy → Easy → Medium → Medium → Hard) and per-question with time limit.
- Integrated an **Open Router** resume analysis pipeline that extracts role-specific skills and dynamically generates contextually relevant HR and technical interview questions.
- Built a **speech-to-text** transcription layer using the Web Speech API.
- Implemented a credit-based monetization system with **Razorpay** integration and designed a post-interview analytics dashboard featuring skill-wise evaluation, AI-generated feedback, downloadable PDF reports.

SmartAssign — Github

- Engineered an AI-powered grading assistant that generates reference answers and structured feedback drafts from instructor-provided course material.
- Designed a retrieval-driven evaluation workflow that compares student submissions against AI-generated reference answers while preserving faculty review and grading authority.
- Designed a modular AI integration layer that enables switching between different language model providers with minimal code changes.
- Reduced inference overhead by implementing stateless PDF processing and structured JSON outputs generation, improving consistency while reducing storage and token overhead.
